PROFILE SUMMARY

Computer Science and Engineering graduate with a strong foundation in Data Analytics, databases, and programming. Skilled in SQL, Advanced Excel, Python, and Power BI, with knowledge of data cleaning, duplicate removal, data transformation, exploratory data analysis (EDA), and dashboard creation. Interested in transforming raw data into meaningful insights that support business decisions. Seeking an entry-level Data Analyst role.

TECHNICAL SKILLS

Data Analysis: Data Cleaning, Data Preprocessing, Duplicate Removal, Data Validation, Exploratory Data Analysis (EDA), ETL
Tools and Technologies: SQL, Advanced Excel, Power BI, Python
Python Libraries: Pandas, NumPy, Matplotlib
Core Skills: Data Visualization, Reporting, Dashboard Development, Analytical Thinking, Problem-Solving

PROJECTS

Nifty 50 Stock Market Analysis Dashboard *Excel, SQL, Power BI, Power Query*

- Combined 50 stock CSV files using Power Query and prepared historical trading data from 2000 to 2021.
- Performed data cleaning, including data type corrections, duplicate removal, and sector mapping.
- Used SQL window functions to calculate daily returns, 50-day moving averages, and stock volatility.
- Developed a 3-page interactive Power BI dashboard with DAX measures to analyze top gainers and losers, sector performance, and 50/200-day moving averages.
- Visualized stock market trends and sector-wise performance to support data-driven analysis.

E-commerce Sales Dashboard *Power BI, Power Query, DAX, Excel*

- Cleaned and transformed sales data using Power Query by correcting errors and removing duplicate orders.
- Designed a Star Schema data model with fact and dimension tables.
- Created DAX measures to track Total Sales, Orders, Units Sold, Active Customers, and Average Order Value.
- Developed a 2-page interactive Power BI dashboard with KPI cards, charts, slicers, and navigation.
- Analyzed 42.7 lakh in sales across 550 orders and identified key insights, including 60% unsold products.

Heart Disease Prediction System *Python, Logistic Regression*

- Prepared a heart disease dataset for machine learning analysis and prediction.
- Cleaned and preprocessed the data by handling missing values and preparing relevant input features.
- Applied Logistic Regression, a classification algorithm, to predict the likelihood of heart disease.
- Evaluated model performance using classification metrics such as accuracy and confusion matrix.
- Presented prediction results through a simple web application interface.

CERTIFICATIONS

- Advanced Excel
- SQL
- Power BI
- Python Programming

EDUCATION

B.E. Computer Science and Engineering **2022 – 2026**
Velammal Engineering College, Chennai CGPA: 8.32/10

Class XII (HSC) **2022**
Velammal Matriculation School 89%

Class X (SSLC) **2020**
G K Shetty Vivekananda Vidyalaya School 75%

LANGUAGES

- English
- Tamil
